

1 Utilities

```
1 import numpy as np

1 def uniform(n):
2     return np.array([1] * n) / n
3
4 def rescale(data):
5     b = np.max(data)
6     a = np.min(data)
7     return (b - data) / (b - a)
```
